

# Multiple WF 2111 Fingerprint Readers

Details on how to use many fingerprint readers on the same PC

## Abstract

This application note describes how to use more than one fingerprint sensor on the same PC.

## Problem

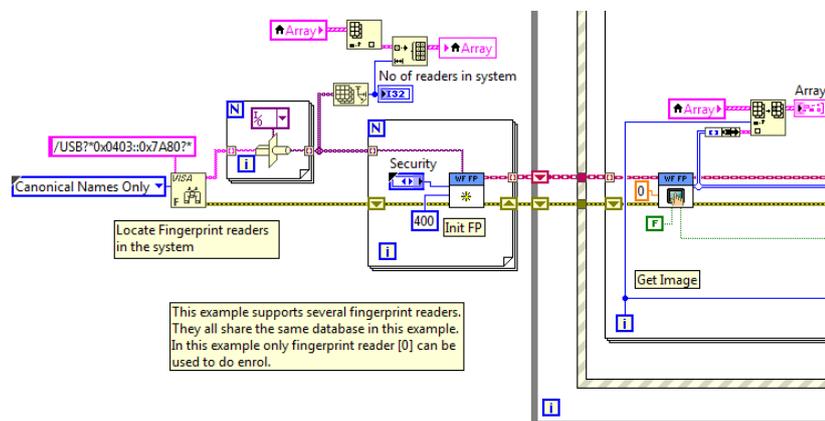

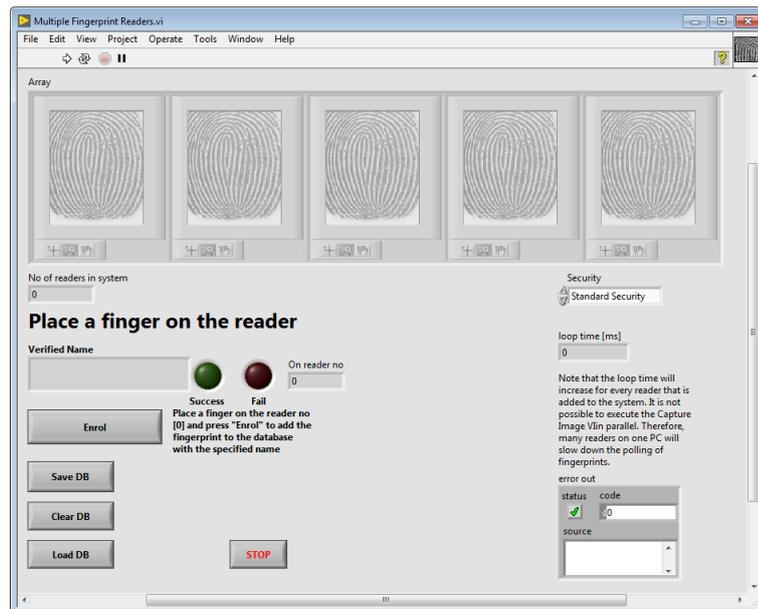

Can multiple WF 2111 fingerprint Readers be used on the same PC?

## Solution

The use of multiple fingerprint readers on one PC is supported since version 1.2.0.65 of the WF 2111 LabVIEW driver. Note that Capture Image.vi cannot execute in parallel. Therefore, adding many fingerprint readers to one PC will slow down the polling of fingerprints.

Example code is available as a zip file from [www.wireflow.se/downloads](http://www.wireflow.se/downloads) (AB0005-101 AN15 Multiple 2111 Fingerprint Readers examples.zip).
