

# Licensing model

for WF Smartphone Sensor Toolkit

The WF Smartphone Sensor Toolkit contains two parts.

- The smartphone app running on the phone.
- The LabVIEW application running on the PC (or compactRIO, MyRIO etc).

The smartphone app is free of charge and may be downloaded Google play store.

The LabVIEW applications are developed using a LabVIEW toolkit. Built application may be distributed in any numbers for free. To use the LabVIEW toolkit a license cost applies.

Three different types of licenses exists:

- Professional license  
Our standard license. 1 Seat.
- Academic/Home license  
The Academic/Home license can ONLY be used for academic/personal purposes. Using it for professional uses is prohibited. 1 Seat.
- Volume license  
The volume license is normally limited in time. One year after activation the license will be deactivated. It is available in multi-license bundles.

## Frequently asked questions

**Q.** May our company use the academic/home license if we only use the toolkit for internal education?

**A.** No

**Q.** May I install the license on several computers.

**A.** No, it is only possible to install it on one computer.

**Q.** May I move the installation from one computer to another?

**A.** Yes. First deactivate on the first computer, then activate on the next. It is possible to do this kind of movement FIVE times.

Deactivation can either be done via LabVIEW > Help > Activate Add-ons... Or via NI License Manager..

**Q.** If I buy a bundle of 20 volume time-limited licenses are all of them expiring after one year from purchase?

**A.** No, each license is separate and is expiring after one year from activation. E.g. this means that you can stock 100 licenses and only use 20 licenses per year for 5 years
