

# DIN Rail Adapters

for the WireFlow Battery Monitoring and Balancing Devices

The DIN Rail Adapters are designed to enable convenient mounting of WireFlow Battery Monitoring and Balancing devices on a standard 35 mm DIN rail.

The adapters provide a robust mechanical interface and allow secure installation of both Battery Monitoring and Balancing Nodes and Gateways in control cabinets, test setups, and laboratory environments.

## Typical use

- Mounting of Battery Monitoring and Balancing devices in control cabinets
- Laboratory and R&D installations requiring standardized DIN rail mounting
- Industrial test systems and fixed installations using 35 mm DIN rails

## Ordering information

Article no	Product
AE0049	DIN Rail Adapter for WF 5218 Node
AE0050	DIN Rail Adapter for WF 522x Gateway
